Chip,

Yes, we have some ideas. Realize that PCC is a community based program, anybody and any program can utilize the expertise of PCC's. It is a one stop shop. So, BP could establish a relationship with the PCC's. What probably needs to happen is you might be able to set up a meeting between Mark Ryan and BP to discuss options. This will greatly enhance the EPI part if PCC's are used. We don't want to loose public health data sets to black hole, like industry tries to keep. This would be a major big deal.

I will call Mark Ryan and discuss. If you support the effort and would like me to set a 3-way call so we can discuss, I can do that as well.
